

Waterford Learning Centre

39-41 Anderson Street, Chatswood NSW 2067

FIRST FLOOR COVERED OUTDOOR LEARNING SPACE

DEVELOPING SPACES AND PLACES TO LEARN IN THE 21ST CENTURY

The new Waterford Learning Centre will ensure the College continues to support its commitment to providing a holistic, innovative and liberating education for all students.

It is important that St Pius X College campuses continue to develop in a manner that serve the changing needs of the learning community. The new Waterford Learning Centre will enable contemporary teaching and learning experiences that are relevant, authentic and creative whilst staying true to the traditions of a proud Edmund Rice school.

The College's Education Brief outlines the future needs of the College and how the land, buildings and the site can accommodate these needs. At this stage the College has no plans to increase the number of students but is committed to improving current facilities and increasing the space available for general student learning.

The brand-new purpose built, modern, two-level learning space:

- will provide 8 new classrooms that can be used as flexible indoor and outdoor learning spaces
- features covered outdoor learning spaces, staff collegial spaces, a lift and ramps for accessibility along with full integration into the College IT network.
- is environmentally sustainable with solar panels, greywater, natural light and air flow
- is currently planned to be used by senior school classes.
